## ABSTRACT

Farming has been identified since the late 1930s as one of the most hazardous occupations in the world, but in general has the least regulation and laws to protect agricultural workers. Several studies have found a higher prevalence of hearing loss among farmers as compared to their non-farming peers. The purpose of this case-control study was to examine the relationship between unintentional injury and hearing threshold levels (HTLs) among male principal operators (PO) living and working on central Ohio cash-grain farms using data from the Ohio Farm Family Health Survey (OFFHS). Five hundred ten male POs participated in Phase 2 of this study where hearing threshold levels were used to assess the risk between HTLs and injury risk. The most noteworthy result was that thresholds poorer than 25 dB for 6000 Hz in the left ear resulted in an OR of 3.35 ( $p=0.01$ , 95% CI=1.29-8.73) increased risk for injury compared to those subjects with thresholds 25 dB or better for 6000 Hz in the left ear after controlling for several potential confounders using multivariable logistic regression. Other significant findings for injury risk for those with >25 dB HTLs were the right, left, and binaural threshold at 6000 Hz, left high-frequency pure tone average, and binaural 500 Hz and 1000 Hz. Based on the p-value and 95% CI, four final ORs were found to be statistically significant (Lt 500, Lt 1000, Lt 6000, Bi 1000). Hearing conservation programs as well as audiometric testing at 6000 Hz for this population will help to reduce the incidence of hearing loss, therefore, likely reducing injury risk among agricultural populations.

## DEDICATION

This paper is dedicated to my grandparents, as they are farmers and taught me the value of education and commitment. It is because of them experiencing hearing loss, due to loud machinery, that I became interested in the profession of audiology and hearing conservation.

## ACKNOWLEDGMENTS

I would like to thank Jay Wilkins who was very patient and helpful during this capstone project. My appreciation of epidemiology and public health has grown even more. My family and other farm families are indebted to researchers like him, who are helping improve the quality of life in agricultural settings. I would also like to thank Larry Feth, who was able to put me in contact with Jay Wilkins and the College of Public Health, School of Epidemiology. His advice, guidance, and the allowance for learning have been wonderful. A special thanks to Angie Ingraham and Anna Strange, who helped guide and support me during capstone writing problems. Lastly, I would like to thank my fellow classmates who I spent endless hours with. Your support, experience, and knowledge have helped turn me into the audiologist I am today. I could have not done this without all of you. Thank you so much.

## **CHAPTER 1**

### **Introduction**

#### **AGRICULTURE AND INJURIES**

Farming has been considered since the late 1930's as one of the most hazardous occupations in the world, but has the least regulation and laws to protect farmers (Schenker, 1996). Several studies have shown that farmers have a higher prevalence of noise-induced hearing loss compared to their age-comparable non-farming peers (Thelin et al., 1983; Marvel et al., 1991; Plakke and Dare, 1992; Gomez, et al., 2001; McBride et al., 2003). For example, Kerr McCullagh, Savik, and Dvorak (2003) studied the hearing thresholds levels (HTLs) of farmers and construction workers. They reported that 67% of farmers in their sample had hearing thresholds greater than 25 dB at 4000 Hz, which is suggestive of noise-induced hearing loss. In contrast, Karlovich, Wiley, Tweed, and Jensen (1988) found no significant difference in HTLs between farmers and non-farmers in a rural area in Wisconsin. The key principal finding was that males in rural areas had poorer thresholds compared to females in the same rural area. Crawford et al. (1998) found the one-year incidence of male principal operators (POs) who experienced an injury was 5.0 per 100 person-years. Browning, Truszczynska, Reed, and McKnight (1998) examined farmers and found an injury rate of 9.0 per 100 farmers. Park et al. (2001) found a cumulative incidence of 10.5% in their study of Iowa farmers. Lyman, McGwin, Enochs, and Roseman (1999) estimated the injury rates of both black and white farmers. They found that 23.4% of the 1,310 farmers had experienced a farm-related injury. White farmers had a higher percentage of injuries compared to black farm workers or black farm owners. Farms with fewer than 11 employees do not have any governing body to enforce safety laws, unlike

other occupational settings or larger farms that require adherence to Occupational Safety and Health Administration (OSHA) safety laws (Schenker, 1996). Possibly due to this lack of oversight supervision, work-related injuries have not declined as in other industries that have regulations implemented by Federal and state governing bodies (Schenker, 1996).

A small number of previous studies have examined injuries in farming populations with respect to hearing loss as a potential risk for agriculture-related injuries (Browning et al., 1998; Crawford et al., 1998; Lewis et al., 1998; Hwang et al., 2001; Sprince et al., 2003; Choi et al., 2005; Sprince et al., 2007). Most of these studies relied on self-report of hearing loss as opposed to audiometric assessment of hearing threshold levels. Choi et al. (2005) examined associations between self-report of hearing loss and audiometric findings and the relationship of both to injury risk. It was reported that self-report of hearing loss had higher injury risk compared to those farmers with hearing loss, classified by their audiometric data. Crawford et al. (1998) found that age (under 30) was a significant factor for injuries among Ohio farmers in addition to self-report of hearing loss.

## OCCUPATIONAL INJURY AND NOISE

Research has also been performed examining hearing acuity and injury risk in other occupational settings such as firemen and steelworkers. Hearing loss was found to be a significant risk factor for injury in a number of studies (Zwerling et al., 1997; Barreto, Swerdlow, Smith, & Higgins, 1997; Zwerling et al., 1998; Ide, 2007). Although most of these studies found hearing loss to be a significant risk factor when examining the self-report of hearing loss, Ide (2007) examined the audiometric thresholds of firefighters to determine hearing loss as a significant risk factor. Ide (2007) found that 0.09% of injuries occurred with firefighters who had hearing loss, which revealed no significance of hearing loss to injury risk.

## OTHER RISK FACTORS FOR INJURY RISK

Limited research has also investigated other noise related factors which may explain injuries. Viljoen, Nie, and Guest (2006) found no association between hearing loss and injury risk but, they did find that accidents occurring to coal-miners with a known hearing loss under the age of 29 may have been influenced by their hearing loss. This significant risk factor may be due to the fact that younger workers have not yet acclimated to their environment and rely more on their senses, as compared to their well-acclimated and older co-workers. Moll van Charante and Mulder (1990) examined how the work environments affect employees with respect to injury risk. It was found that in quiet working conditions ( $<82.5$  dBA) or in low job-related hazards, injuries increased for men with hearing loss compared to those men without hearing loss (OR 1.90). Noise levels greater than 82.0 dBA in the work environment contributed significantly to the risk of injury for male shipyard workers (OR 1.81).

## HEARING ACUITY AND NOISE DEFINITIONS

Normal hearing is defined as thresholds less than or equal to 25 dB from 250 Hz to 8000 Hz (ASHA, 1990). Thresholds that are greater than 25 dB, indicates a hearing loss. Three different types of hearing loss can occur: conductive, sensorineural, or mixed. The audiometric indication of a conductive hearing loss is normal bone conduction thresholds with pure-tone air conduction thresholds poorer than 25 dB and an air-bone gap greater than 10 dB. Sensorineural hearing loss is indicated through audiometry by pure-tone air and bone conduction thresholds poorer than 25 dB with no air-bone gap greater than 10 dB. The audiometric indication of a mixed hearing loss is pure-tone air and bone conduction poorer than 25 dB with an air-bone gap greater than 10 dB. The type, degree, and configuration of the hearing loss are determined by audiometry. Excessive noise exposure may cause a sensorineural hearing loss, which is

characterized by a high-frequency hearing loss with a noise notch present between 3000-6000 Hz. It is often accompanied by tinnitus and loudness recruitment (Cooper & Owen, 1976; Ward, 1979).

#### NOISE-INDUCED HEARING LOSS PREVENTION

Engineering, education, and enforcement are methods used to prevent noise-induced hearing loss. Engineering strides to reduce machine noise to safer output levels have been done, but farmers do not always have the need or desire to upgrade to this safer equipment. Because enforcement by OSHA is not required for farms with fewer than 11 workers (Schenker, 1996), enforcement cannot be utilized effectively to reduce the incidence of noise-induced hearing loss among small farm populations. Education of farm families and their employees can be an effective way to prevent hearing loss. Previous research has shown that only 17% of the farmers interviewed wear hearing protective devices (HPD) when exposed to loud noises (McCullagh, Lusk, & Ronis, 2002). Wilkins et al. (1998) found that of the 1700 respondents questioned, 2/3 of them never wear hearing protection when around loud farm machinery and noise. Jenkins et al. (2007) found that only 30% of the farmers interviewed wear hearing protection consistently when exposed to loud noises. In addition, 33.8% of the women helping on the farm more than 20 hours a week wear hearing protection compared to those women helping with farm chores less than 20 hours a week (24.6%) (Meeker, Carruth, & Holland, 2002). Jenkins et al. (2007) found that after intervention and education to farm families and employees, use of HPDs increased significantly.

Many of the previous studies have utilized self-report questionnaires to report hearing loss or only examined the threshold level at one frequency in one ear. The purpose of this case-

control study was to examine the relationship between injury and (HTLs) among male POs living on Ohio cash-grain farms using data from the Ohio Farm Family Health Survey (OFFHS).

## **CHAPTER 2**

### **Methods**

The data were collected during the multi-phase Ohio Farm Family Health Survey (OFFHS) sponsored by the National Institute for Occupational Safety and Health (NIOSH), which was part of a larger nationwide effort focusing on agricultural safety and health. In Phase 1 of the study, 4860 questionnaires were sent out in June 1993 to cash-grain farmers in Ohio. The questionnaire (Appendix 1) was based upon several survey instruments including the National Center for Health Statistics' (NCHS) National Health Interview Survey and NCHS's Third National Health and Nutrition Examination Survey (NHANES III) (Crawford, 1995; Wilkins et al., 1997; Wilkins, 1997). Of the 4860 questionnaires sent out, 2571 questionnaires were filled out; 1793 of these were fully completed and considered "usable." Following Phase 1, eligible Phase 1 responders from 20 Central Ohio counties were asked to participate in Phase 2. Phase 2 consisted of in-home health screenings conducted by a specially-trained nurse who measured height and weight and conducted audiometry and spirometry according to standard procedures.

#### **AUDIOMETRIC ASSESSMENT**

The "exposure" variable of interest in this study was hearing threshold levels (HTLs) as determined by standard audiometric procedures. Audiometry was conducted with the Earscan Acoustic Impedence MP Audiometer (Model ES-TRAM, Microaudiometrics, South Daytona, FL) and TDH-39 headphones. Pure-tone air conduction thresholds were tested at the following frequencies: 500 Hz, 1000 Hz, 2000 Hz, 3000 Hz, 4000 Hz, 6000 Hz, and 8000 Hz in each ear.

Audiometers were self-checked weekly with annual calibrations in accordance with ANSI Standard S3.6-1989. The audiometry testing took place in a quiet location in the home of the participant. Background noise was assessed during follow-up testing with the Quest Electronics Bio-Acoustic Simulator and Octave Monitor (Model BA-201-25, Oconomowoc, WI.) Using these threshold levels, calculations were made using formulas and methods to help determine the risk for injury based on these thresholds. In addition to ear-specific results, several other means were obtained as well, including the binaural average, the low frequency pure tone average (LTPA), and high frequency pure tone average (HPTA). The LPTA was defined as the mean of the HTLs obtained at 500 Hz, 1000 Hz, and 2000 Hz. The HPTA was defined as the mean of the HTLs obtained at 3000 Hz, 4000 Hz, and 6000 Hz. These definitions are based on NCHS's Third National Health and Nutrition Examination Survey (NHANES III) (Niskar et al., 1998). The poorer ear was also determined for each frequency.

#### CASE SELECTION

Case selection identification was based on the response to the following Phase 1 question: "During the past 12 months, have you, a family member, or any other person who regularly lives or works on this farm had an injury for which the injured person saw or talked to a medical doctor or assistant, or the injured person cut down on their usual activities for more than half a day?". Of all the male POs from the 20 county central Ohio area who participated in the Phase 2 data collection effort (n=510), 51 male POs answered yes to having an injury within the year preceding questionnaire administration.

#### CONTROL SELECTION

Controls were also male POs who participated in both Phase 1 and Phase 2 of the study, with the exception that they did not answer yes to the question given above. Using this

criterion, 459 male POs satisfied inclusion criterion as controls. Therefore, the control group was male PO farmers with no reported injury over the past year after questionnaire administration. No matching of cases to controls was performed.

## INJURY CODING

The injuries were recorded and coded into the database using codes from the International Classification of Diseases-9 (ICD-9). The reported injuries were classified by the external cause of the injury (E-code) to describe the surroundings during the time of the injury and the nature of the injury (N-code) to describe the body part affected.

## POTENTIAL CONFOUNDERS

A list of potential confounders were determined based on previous research (Crawford, 1995; Wilkins et al., 1997). Based on this list, means and standard deviations (SD), and crude ORs were estimated and tabulated for descriptive purposes and to assist in the identification of confounders. Confounding variables of interest fall into three categories: Sociodemographic, Behavioral, and Farm Characteristics. Sociodemographic variables included age, marital status, education, race and ethnicity. Behavioral variables included alcohol consumption in the past year, alcohol consumption in the PO's lifetime, any form of tobacco use in the past year, current smoker, and smoking in the PO's lifetime. Farm characteristic variables included total number of animals, annual gross sales, days spent on someone else's farm, and the percentage of time spent farming.

## STATISTICAL ANALYSIS

For this study, SPSS 16.0 was used for statistical computing. The first part of the study was to select the case and control groups. Of all the male POs from the 20 county central Ohio area who participated in the Phase 2 data collection effort (n=510), 51 male POs answered yes to

having an injury within the year preceding questionnaire administration. Using this criterion, 459 male POs satisfied inclusion criterion as controls. Following this, SPSS was used to obtain statistical analysis on the two groups. Descriptive case-control comparisons were made by using logistic regression modeling, which produced the measure of association of interest, the odds ratio (OR). The first step in estimating the ORs was to generate tables for the various exposure variables and potential confounders by case-control status. “Exposures” in this context were the ear specific HTLs of the frequencies assessed by audiometry, the binaural averages, and the “poorer ear.” The exposure variables were treated as continuous variables and then also categorized. For the categorized HTLs, a >25 dB fence was used. This is based on ASHA (1997), NIOSH, and OSHA’s definition of “normal hearing.” After calculating the crude ORs for the various frequency-specific HTLs, adjusted odds ratios (aORs) were estimated by adding age into the model. Other potential confounding variables were then added into the model in the way suggested by Hosmer & Lemeshow (2000). Using a p-value of 0.05 as the definition of statistically significant, ORs were calculated to determine the full model between HTLs and injury risk. Hosmer-Lemeshow goodness of fit test was used to determine the fit for the full model between HTLs and injury risk.

## **CHAPTER 3**

### **Results**

#### **CASE AND CONTROLS**

During Phase 2 of the OFFHS study, 1252 subjects participated in the home-health screenings and on-farm hazard assessments. Of these 1252 subjects, 520 (40.7%) subjects were principal operators (PO). Of these 520 POs, 10 were female and were excluded for the purposes of this study. The other 732 participants were female, children, or another male who was not the principal operator and therefore, were excluded from the data analysis. The 510 male POs were the participants that were used for the purpose of this study. Of these 510 male POs, 51 responded yes to the injury question, as previously described and therefore, made up the case group. The control group was comprised of the other male POs ( $n=510-51=459$ ).

#### **DESCRIPTION OF INJURIES**

Table 1 presents the frequency distribution of the external causes of the injuries (E-codes). Of the 51 injuries reported, 16 were falls (31.4%), accounting for the majority of the injury causes, followed by 13 from overexertion or straining (25.5%), and 10 due to farm machinery (19.7%). Other external causes of injuries were 3 being struck by an animal (5.8%), 2 by tools or sharp objects (3.8%), and 2 by a motor vehicle accident (3.8%). Five of the 51 injuries were caused by being struck against or being caught by an object (2%), a foreign body in the eye (2%), fire (2%), an arthropod bite or sting (2%), or unspecified (2%).

Table 2 summarizes the frequency distribution for the nature of the injury (N-codes). Sprains and strains ( $n=17$ ) contributed to the majority of the nature of the injuries (33.3%)

followed by 8 fractures (15.6%), and 6 open wounds (11.8%), superficial injuries and contusions (11.8%), and other and/or unspecified injuries or multiple sites (11.8%). Other types of injuries found among the cases were four dislocations (7.8%), two injuries due to foreign bodies in the eye (3.9%), one burn (2%), and one arthropod bite or sting (2%).

Table 1: Description of Cases by Number and Frequency of ICD-9 E-Codes (External Cause of Injury Codes)

| E-Code        | Description                              | Cases |       |
|---------------|--|-------|-------|

| Total         |   | 51    | 100.0 |

## BASIC AUDIOMETRIC FINDINGS

During the Phase-2 health assessment conducted in-home by a nurse, pure-tone audiometry and tympanometry was performed. Frequency and ear-specific results are summarized in Tables 3 and 4. In addition to ear-specific results, several different means were obtained. For both cases and controls, the audiometric HTLs tended to increase (worsen) from 500-6000 Hz (Tables 3 and 4). Overall, the control group had poorer HTLs than the case group at all frequencies. At all frequencies, the left ear was poorer than the right ear. The three-frequency low pure-tone average (LPTA) for the right ear was higher (poorer) for the cases (16.2 dB) compared to the control group (14.9 dB) (Table 3). The left ear LPTA displayed similar results; the cases' LPTA was 17.5 dB and the controls' was slightly better at 16.0 dB (Table 4). The right ear HPTA mean was 35.7 dB (SD=19.5) for the cases, which was slightly better than the mean for the controls (37.2 dB, SD=21.1) (Table 3). The left ear mean HPTA for the cases (40.2 dB, SD=18.1) was equal when compared to the control group (40.0 dB, SD=20.8) (Table

4). Clinically, there was no significant difference between the case and control groups for the HTLs.

Table 3: Right Ear Mean HTLs by Frequency and Case-Control Status

| Frequency (Hz) | Cases |        |      |      | Controls |        |      |      |
|----------------|-------|--------|------|------|----------|--------|------|------|
|                | n=51  | Median | Mean | SD   | n=459    | Median | Mean | SD   |
| 500            |       | 15     | 15.4 | 11.8 |          | 10     | 13.7 | 11.6 |

## DEMOGRAPHIC DATA

As shown in Table 6, the mean age for the case group was found to be 51.0 years (SD=21) as compared to the control group of 54.0 years (SD=21). After conducting a Student's t-test, no significant difference was found between the case and control group with regards to age ( $p=0.64$ ). In both groups, the majority of the subjects were married; 46 cases (92%) compared to 381 controls (83.6%). Two of the cases were divorced (3.9%) and one was never married (2%). One of the cases did not report marital status (2%). The control group consisted of 17 widowed (3.8%), 11 divorced (2.4%), 2 separated (0.4%), and 21 were never married (4.6%). Twenty-eight subjects in the control group did not report their marital status (6.1%) information (Table 7). Using  $X^2$  p-values, no significant difference was found between the case and control groups with respect to marital status ( $p=0.33$ ). The majority of the subjects in the case (45.1%) group were high school graduates with a slightly greater percentage of high school graduates in the control (52.2%) group. There were 13 cases that were college graduates (25.5%), 10 with some college education (19.6%), and five that did not graduate from high school (9.8%). Compared to the case group, 99 controls were college graduates (21.5%), 75 had some college education (16.3%), and 37 did not graduate from high school (8.0%) (Table 7). Using  $X^2$  p-values, no significant difference was found between the case and control groups with respect to education ( $p=0.71$ ).

#### BEHAVIORAL CHARACTERISTICS

Behavioral characteristics for both the case and control groups are summarized in Table

8. Slightly more POs of the control group reported drinking alcohol in their lifetime (69.3%) as compared to the case group (64.7%) but no statistically significant differences were found between the case and control groups ( $p=0.44$ ). Of the 459 controls, 178 (38.8%) reported drinking alcohol within the past year as compared to 16 of case group (31.4%). There was no significant difference found between the case and control group for the alcohol consumption within the past 12 months ( $p=0.29$ ). A larger percentage (70.6%) of the control group had used some form of tobacco other than cigarettes as compared to the case group (25.1%) but this was not significantly different between the case and control groups ( $p=0.82$ ). Many more of the cases ( $n=34$ , 66.7%) had smoked at least five packs of cigarettes in their lifetime compared to the control group ( $n=162$ , 35.3%). Both the case and control groups were asked about using

cigarettes within the past year. The vast majority for both the cases (n=47, 92.2%) and controls (n=407, 88.7%) had not used cigarettes in the past year. Other forms of tobacco and cigarette use were not statistically significant between the case and control groups (Table 8). Because the cases and controls are similar with respect to the variables considered in Table 8, these variables are probably not confounders.

Table 8: Behavioral Characteristics by Case-Control Status

| Variable  | Q <sup>2</sup> .<br>number | Cases   |    |       | Controls |       | p-value |

## SELECTED FARM/FARMER CHARACTERISTICS

Certain characteristics of the farm and the farmer may contribute to injury risk. Information about the percentage of time farming, total number of animals on the farm, total annual sales, and days spent on someone else's farm was collected. Table 9 summarizes the results of comparing cases and controls with respect to selected farm/farmer characteristics. The majority of the case group (31.4%) had total annual sales of \$10,000-\$39,999, which is similar to that of the control group (25.5%). No significant difference using the  $X^2$  test was found between the case and control groups ( $p=0.27$ ). The average number of total animals within the case group was 140.8 (SD=310.2), which is very similar to the control group ( $n=145.0$ , SD=440.5). Using the Student t-test, no significant difference was found between the case and control groups ( $p=0.95$ ). The case group spent more days on someone else's farm ( $n=48.7$ , SD=77.4), as compared to the control group ( $n=28.9$ , SD=53.6), which was not significantly different ( $p=0.33$ ). The percentage of time spent farming was also assessed. In both groups the majority of POs farmed between 80% and 100% of the time. There was no significant difference between case and control group ( $p=0.36$ ). Because the cases and controls are similar with respect to the variables considered in Table 9, these variables are probably not confounders.

Table 9: Selected Farm/Farmer Characteristics by Case-Control Status

| Variable                                  | Cases                      |      |       | Controls |       |         |

## LOGISTIC REGRESSION RESULTS FOR CONTINUOUS VARIABLES

Table 10 summarizes the results of assessing the potential association between the odds of unintentional injury and the frequency-specific HTLs treated as a continuous variable. Based on the p-values and 95% CIs, no crude odds ratios were found to be statistically significant in conventional terms, although the left 500 Hz odds ratio approached significance ( $p=0.08$ , 95% CI=1.00-1.05). This may have been due to a chance finding.

Table 10: Logistic Regression Results Treating the HTLs as Continuous Variables

| Ear | Frequency (Hz)    | cOR  | p-value | 95% CI    |
|-----|-------------------|------|---------|-----------|
| Rt  | 500               | 1.00 | 0.82    | 0.98-1.03 |

| Bi  | HPTA              | 1.00 | 0.97    | 0.99-1.02 |

<sup>4</sup> LPTA=Average of 500 Hz, 1000 Hz, and 2000 Hz

<sup>5</sup> HPTA=Average of 3000 Hz, 4000Hz, and 6000 Hz

Because hearing acuity is strongly associated with age, all of the injury-HTL ORs were age-adjusted by adding age to the one-variable models (see Table 11). The two-variable models resulted in two age-adjusted ORs that were found to be statistically significant ( $OR > 1$ ) (Lt1000 and Bi 2000). Left 2000 Hz approached significance ( $p=0.09$ , 95% CI=1.00-1.04). In general, age-adjustment slightly increased the magnitude of the ORs, which is not surprising given the fact that cases were younger on average than controls (51.0 years versus 54.0 years, respectively, as shown in Table 3). Following the construction of two-variable models, three-variable models were constructed to help guide the multivariable model for logistic regression (Appendix 2). Variables affecting the ORs by  $\pm 10\%$  for continuous variables were considered for the multivariable model.

#### MULTIVARIABLE LOGISTIC REGRESSION TREATING HTLs AS CONTINUOUS HTLs

The multivariable full model consisted of those potential confounders that were controlled for in the three variable model and statistically changed the OR by  $\pm 10\%$  for the exposure variable. The final model consisted of the following variables: Education (Q.17), Age, Past Cigarette Use (Q.31), Have Ever Drank Alcohol (Q.36), Total Annual Sales Value (Q.7), and the Percentage of Time Spent Farming (Q.19). The model building approach was adapted from Hosmer and Lemeshow (2000). Regression diagnostics were assessed with the Hosmer-Lemeshow goodness-of-fit test. Based on the p-value and 95% CI, four final ORs were found to be statistically significant (Lt 500, Lt 1000, Lt 6000, Bi 1000) as seen in Table 12. In addition, several “exposure” variables approached significance (Rt 1000, Poorer ear, Bi 6000, Lt LPTA). In general, it was found that as hearing acuity became poorer, the risk for injury increased. In addition to these findings, the right 1000 Hz, the poorer ear (left), binaural 6000 Hz, binaural LPTA, and the left ear LPTA approached significance (Table 12). This model for all three

exposure variables were considered a good fit ( $p>0.05$ ) based on Hosmer and Lemeshow (2000).

For every decibel that a HTL worsens, injury risk increases.

Table 11: Two Variable Logistic Regression Results Treating the HTL as Continuous Variables and Controlling for Age

| Ear | Frequency  | cOR  | aOR  | For aORs |           |
|-----|------------|------|------|----------|-----------|
|     |            |      |      | p-value  | 95% CI    |

#### LOGISTIC REGRESSION RESULTS TREATING HTLs AS A CATEGORICAL VARIABLE

After treating the HTL as a continuous variable, a >25dB fence was used to categorize cases and controls as “exposed” and “not exposed”. Table 13 summarizes the number of cases

and controls classified as “exposed” and “not exposed, ” along with the crude odds ratios. Based on the p-value and 95% CI value, no crude odds ratios were found to be statistically significant in conventional terms, although four variables (Lt 6000 Hz, Bi 1000 Hz, Bi 6000 Hz, Lt LTPA, and Rt HPTA) approached significance as shown in Table 13.

After controlling for age with the >25 dB fence several age-adjusted ORs were found to be statistically significant at the  $p < 0.05$  level (Lt 6000 Hz, Bi 1000 Hz, Bi 6000 Hz, and Rt HPTA) (Table 14). It was also found that the right 6000 Hz adjusted odds ratio of 2.15 ( $p = 0.06$ , 95% CI = 0.97-4.75) and the binaural 500 Hz aOR of 2.14 ( $p = 0.07$ , 95% CI = 0.95-4.80) approached statistical significance. In general, age-adjustment increased the magnitude of the ORs. Following the two-variable model, three-variable models were constructed to help guide the determination of the multivariable model (Appendix 2). Variables affecting the cORs by  $\pm 10\%$  for continuous variables were considered for the multivariable model.

#### MULTIVARIABLE LOGISTIC REGRESSION MODELS TREATING HTLs AS A CATEGORICAL VARIABLE

The multivariable full model consisted of those potential confounders that were controlled for in the three variable model and statistically changed the OR by  $\pm 10\%$  for the exposure variable (see Table 15). The final model consisted of the following variables: Education (Q.17), Age, Past Cigarette Use (Q.31), Have Ever Drank Alcohol (Q.36), Total Annual Sales Value (Q.7), and the Percentage of Time Spent Farming (Q.19). The model building process was adapted from Hosmer and Lemeshow (2000). Regression diagnostics were assessed with the Hosmer-Lemeshow goodness-of-fit test. Based on the p-value and 95% CI, six final ORs were found to be statistically significant (Rt 6000 Hz, Bi 500 Hz, Bi 1000 Hz, Bi 6000

---

<sup>6</sup> Adjusted for Age, Education, Past Cigarette Use, Have Ever Drank Alcohol, Total Annual Sales Value, and Percentage of Time Spent Farming

Hz, Lt 6000 Hz, and Lt HPTA). In addition, several “exposure” variables approached significance (Lt 3000 Hz, Poorer ear, and Bi 3000 Hz). As shown in Table 15, the most notable result was that thresholds poorer than 25 dB for 6000 Hz in the left ear resulted in an aOR of 3.35 ( $p=0.01$ , 95% CI=1.29-8.73). Other significant findings for those with >25 dB HTLs were the right and left 6000 Hz, left HPTA, binaural 500 Hz, binaural 1000Hz, and binaural 6000 Hz. Three other findings approached significance (Lt 3000 Hz, poorer ear (left), and Bi 3000 Hz). In general, controlling for potential confounders increased the magnitude of the ORs (Table15). Using the Hosmer and Lemeshow (2000) formula as a guide, goodness of fit was assessed. This model resulted in significance values of  $p>0.05$ , which is a good model fit according to Hosmer and Lemeshow (2000).

<sup>9</sup> Adjusted for Age, Education, Past Cigarette Use, Have Ever Drank Alcohol, Total Annual Sales Value, & Percentage of Time Spent Farming

## **CHAPTER 4**

### **Discussion and Conclusion**

#### **INJURY ASSESSMENT**

Male farmers in 20 central Ohio counties who completed both the Phase 1 questionnaire and audiometry in Phase 2 comprised the sample for this study as part of the larger OFFHS study. Of these 510 male farmers, 51 reported an injury within the year preceding the questionnaire administration. This injury rate of 10.0% is consistent with previous studies examining the injuries among farming populations. For example, Browning, et al. (1998) who found a prevalence of injury among farmers to be 9.0 per 100 people. Lewis et al. (2001) determined a cumulative incidence of injury among Iowa farmers to be 10.5%. Falls were the primary external cause for the injuries (n=16, 31.4%) as shown in Table 1. Sprains and strains comprised the majority of the type of injuries that were reported by the case group (n=17, 33.3%, see Table 2).

#### **AUDIOMETRIC FINDINGS**

Upon initial inspection, the audiometric thresholds for the case and control groups were very similar. Graphing the average threshold levels by frequency revealed a noise-notch pattern with the notch present at 6000 Hz in the left ear, right ear, and the binaural average (see Figures 1-3). Though not clinically significant, the control group had poorer hearing acuity than the case group, it is important to note that the control group was overall older than the case group, which likely accounts for the poorer threshold levels among controls. In both groups, the left ear mean HTL was poorer than the right ear and also had poorer mean HTLs at every frequency compared

to the right ear. There are many reasons that may account for these poorer thresholds in the left ear. One of these reasons could be due to open cab tractors, as they are much louder than closed cab tractors. As farmers are driving tractors and look over their right shoulder, the left ear is closer to the tractor engine noise, resulting at an increased risk for excessive noise exposure and subsequent hearing loss. Another reason that could contribute to the poorer left ear findings could be certain recreational activities. A right-handed gun shooter is at risk for a noise-induced hearing loss in the left ear, which may contribute to the poorer thresholds in the left ear as well.

#### HTLs and INJURY RISK

The most notable result of the multivariable regression modeling was the high-frequency pure-tone average (HPTA) in the left ear using a fence of  $>25$  dB, which resulted in an adjusted odds ratio of 3.35 (95% CI=1.01-4.86) for injury risk. The final model consisted of age, education, ever smoking cigarettes, ever drinking alcohol, total annual sales value, and the percentage of time spent farming. It is important to note that age was controlled for because increased age is strongly associated with hearing loss and younger age is associated with injury risk (Crawford, 1995). Several significant results were found for both continuous variables and categorizing the variables into “exposed” and “not exposed”. Arguably, the most notable results were for the categorical variables of “exposed” and “not exposed” using a  $>25$  dB fence. The most marked finding was that for 6000 Hz in either ear or the binaural average of the two ears at 6000 Hz, resulted in an increased risk for injury for those subjects with HTLs  $>25$  dB (see Table 15).

These results are hard to compare to other studies, as other studies investigating injury risk and hearing loss either relied on self-report of hearing loss or used specific and limited audiometric data. No known previous studies have examined only HTLs as the exposure

variable. The increased risk for injury due to hearing loss is consistent with previous studies examining hearing loss (Browning et al., 1998; Crawford et al., 1998; Lewis et al., 1998; Hwang et al., 2001; Sprince et al., 2003; Choi et al., 2005; Sprince et al., 2007).

## POSSIBLE MECHANISMS

There are several theories as to what the mechanism may be in explaining the relationship between poorer hearing acuity and injury risk. One of these reasons could be that poorer hearing acuity contributes to communication difficulties, especially in the presence of competing noise, or at distances. Because farm machinery and some agriculture-related farm tasks are noisy, it may be difficult to communicate with coworkers. Moll van Charante and Mulder (1990) found noise levels >82 dB(A) to significantly increase the risk for injury for shipyard workers with both normal hearing acuity and poor hearing acuity. Therefore, these subjects may miss critical information needed to make decisions to avoid injury. Another possible theory could be that important environmental sound cues are missed by farmers with poorer hearing acuity. These environmental cues may be important in recognizing and avoiding danger and being able to react to prevent an unintentional injury from occurring. It is interesting to note that 6000 Hz was the poorer HTL for both ears and also resulted in the greatest risk for injury. There may be some underlying cues listeners use at 6000 Hz that are missed with poorer hearing acuity at this frequency.

## CONCLUSION

There has been previous research examining risk factors associated with injury in which hearing loss was found to be a significant factor, but there are few studies examining audiometric hearing thresholds levels (HTLs) and injury risk. Because of this, the results of this study may further help audiologists, public health workers, and others interested in hearing loss and injury

risk to reduce the incidence of injuries among the agricultural community. Because OSHA has not created agricultural safety laws for farms with fewer than 11 workers, it is vital that education for hearing loss prevention be targeted towards this population. The noise-induced hearing threshold pattern seen in the farmers, further emphasizes importance of hearing loss prevention programs for farming populations. In this study, the hearing threshold level (HTL) pattern also reveals the importance for audiologists to routinely test 6000 Hz during audiometric testing especially when the patient has recreational or occupational noise exposure history.

As health care professionals, audiologists should always be thinking of ways to help patients communicate more effectively as a result of their hearing loss. There are times that other implications of a hearing loss experienced by an individual in addition to their communication needs are forgotten. As a result of a hearing loss, non-fatal and even fatal injuries may result. By providing farmers with a tangible possible consequence of hearing loss, it may help to more effectively improve hearing conservation programs. It is important for audiologists to work with other professionals for an increased awareness of hearing conservation and hearing loss prevention. Having audiologists collaborate with other professionals, new and creative ideas can be found to more effectively teach agricultural communities and help try to reduce hearing loss among this population, therefore, reducing the incidence of injuries among the agricultural community.

## APPENDIX 1

# THE OHIO FARM FAMILY HEALTH STUDY

Form Approved

OMB NO. 0920-0313

Exp. Date 2-29-9

PLEASE  
READ  
THIS FIRST

PAGES 1-13 (SECTIONS 1-9) ARE TO BE FILLED OUT BY THE FARM'S PRINCIPAL OPERATOR (THE SENIOR PARTNER OR THE FARMER WHO IS IN CHARGE OF THE DAY-TO-DAY FARMING DECISIONS). PAGES 14-16 (SECTIONS 10-14) ARE TO BE FILLED OUT BY THE OPERATOR'S SPOUSE OR BY THE PERSON LIVING IN THE HOUSEHOLD CLOSEST IN AGE TO THE PRINCIPAL OPERATOR. ALL INFORMATION YOU GIVE WILL BE TREATED IN A CONFIDENTIAL MANNER. PLEASE CAREFULLY READ THE MARKING DIRECTIONS BELOW BEFORE PROCEEDING.

## MARKING DIRECTIONS

- Go from QUESTION to QUESTION in numerical order unless instructed otherwise. Please follow the directional arrows.
- Do not make stray marks on this form. Fill ovals completely.
- Erase cleanly entries you wish to change.
- Correct mark
- Incorrect marks
- When your answer to a question is "zero" or "none," don't leave the question blank - be sure to indicate "zero." When a vertical grid is provided for a numerical answer, write numbers in boxes provided, and then blacken appropriate oval directly below each number.
- When a horizontal grid is provided for a numerical answer, blacken ovals so they add up to the right number.
- When a space or box is provided, please write in the requested information.
- When completed, return in the 9x12 postage paid envelope provided.
- PLEASE DO NOT FOLD THE QUESTIONNAIRE BOOKLET.

EXAMPLE:

Date of birth = "December 18, 1949" →

| MO | DAY | YR |
|----|-----|----|
| 1  | 2   | 1  |
| 2  | 3   | 2  |
| 3  | 4   | 3  |
| 4  | 5   | 4  |
| 5  | 6   | 5  |
| 6  | 7   | 6  |
| 7  | 8   | 7  |
| 8  | 9   | 8  |
| 9  | 0   | 9  |

EXAMPLE:

Hours worked per week = "54"

|    |    |    |    |    |    |    |    |    |
|----|----|----|----|----|----|----|----|----|
| 10 | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 |
| 1  | 2  | 3  | 4  | 5  | 6  | 7  | 8  | 9  |

EXAMPLE:

Write in last off-farm job you had →

WRITE IN

Painter

## SECTION 1 Background Information on the Farm and the Principal Operator

### A. Farm Characteristics

1a. Name and address label →

1b. Please indicate the Ohio county where the bulk of the farm is located →

WRITE IN COUNTY NAME

SELECT COUNTY CODE FROM LIST A. LIST A AND ALL OTHER LISTS REFERRED TO ARE ON ENCLOSED YELLOW SHEET

1c. Please correct any name and address information in the label above by writing in the correct information below:

|                              |                       |    |              |
|------------------------------|-----------------------|----|--------------|
| NAME OF FARM →               | WRITE IN NAME OF FARM |    |              |
| LOCATION OF FARM →           | WRITE IN STREET/ROAD  |    | CITY OR TOWN |
| NAME OF PRINCIPAL OPERATOR → | FIRST NAME            | MI | LAST NAME    |

1d. Please give your telephone number. We may need to contact you later. →

| AREA CODE | NUMBER |
|-----------|--------|
|           |        |

2. Does the Principal Operator live on this farm? ☐ Yes ☐ No

PLEASE DO NOT WRITE IN THIS AREA

011309

- 3a. What is the total number of people that have assisted in the operation of this farm in the past 12 months? →

| NUMBER |    |    |    |    |    |    |    |    |   |
|--------|----|----|----|----|----|----|----|----|---|
| 10     | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 |   |
| 0      | 1  | 2  | 3  | 4  | 5  | 6  | 7  | 8  | 9 |

- 3b. How many of these were seasonal or migrant workers? →

| NUMBER |    |    |    |    |    |    |    |    |   |
|--------|----|----|----|----|----|----|----|----|---|
| 10     | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 |   |
| 0      | 1  | 2  | 3  | 4  | 5  | 6  | 7  | 8  | 9 |

4. As of today's date, please give the number of acres worked as part of the normal commercial operations of this farm: →

|   | NUMBER OF ACRES          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |
|---|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|

| 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |

7. What was the approximate sales value of all products (crops and animal) from this farm IN THE PAST 12 MONTHS?

☐ 0 - \$9,999    ☐ \$10,000 - \$39,999    ☐ \$40,000 - \$99,999    ☐ \$100,000 - \$249,999    ☐ \$250,000 or more

## B. Pesticide Use

8. During the last growing season, what pesticides were used on crops on this farm? Refer to LIST B (see enclosed yellow sheet) and record all that were used.

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40 41 42

9. During the last growing season, were you personally involved in mixing, loading, or applying any of the pesticides?

☐ Yes    ☐ No

10. During the NEXT growing season, what pesticides do you plan on using on crops on this farm? Refer again to LIST B and record all that you plan on using.

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40 41 42

## C. Census of Farm Dwellers

11. Please list the initials of the names of all persons who REGULARLY live or work on this farm, then complete the rest of the table. Persons listed here should include the Principal Operator (P.O.), the Operator's family who regularly lives and/or works on this farm, and other family members who may live in a separate residence on this farm. Please also include hired workers, friends, relatives, or roomers who regularly live and/or work on this farm. If there are more than 10 people involved, please provide the same information on a separate piece of paper, giving each a "person no." like in the table.

| PERSON NO. | RECORD PERSON'S INITIALS  | INDICATE SEX OF PERSON                                     | INDICATE YEAR OF PERSON'S BIRTH                 | INDICATE RELATIONSHIP TO P.O. (Use LIST C) | INDICATE WHERE PERSON LIVES   | PERFORMS PHYSICAL PART OF FARM OPERATION?   | INDICATE 'PAY' STATUS ON THIS FARM                         |

12. In addition to the individuals listed above in Question 11, are there other persons who worked on the commercial operation of this farm IN THE PAST 12 MONTHS such as seasonal workers, migrant workers, or others who may have worked or helped out on an OCCASIONAL basis?

☐ No ☐ Yes

**12a.** How many of these workers were there?

NO. 0 1 2 3 4 5 6 7 8 9

**12b.** What were their usual job tasks? Refer to LIST D and select all codes that apply.

1 2 3 4 5 6 7 8 9 10

**12c.** About how many days did they typically work on the farm IN THE PAST 12 MONTHS?

NUMBER OF DAYS 0 1 2 3 4 5 6 7 8 9

**SKIP TO Q. 13**

## D. Demographic Data on PRINCIPAL OPERATOR

13. Your date of birth is

| MO                  | DAY                 | YR                  |
|---------------------|---------------------|---------------------|

## E. Work History of PRINCIPAL OPERATOR

19. For each occupation listed to the right, please estimate the percentage of your time spent in each DURING THE PAST 12 MONTHS.

| OCCUPATION  | PERCENT OF TIME                  |
|---|----------------------------------|
| Farming   | 0 10 20 30 40 50 60 70 80 90 100 |
| Farm administration (record keeping, inventory, etc.) | 0 10 20 30 40 50 60 70 80 90 100 |
| Home making   | 0 10 20 30 40 50 60 70 80 90 100 |
| Student   | 0 10 20 30 40 50 60 70 80 90 100 |
| Other employment                                      | 0 10 20 30 40 50 60 70 80 90 100 |

20. How many days IN THE PAST 12 MONTHS did you work at least 4 hours per day on the operation of this farm?

- ☐ None  
☐ 1 or more

INDICATE NUMBER OF DAYS

| NUMBER OF DAYS |     |     |    |    |    |    |    |    |  |
|----------------|-----|-----|----|----|----|----|----|----|--|
| 100            | 200 | 300 |    |    |    |    |    |    |  |
| 10             | 20  | 30  | 40 | 50 | 60 | 70 | 80 | 90 |  |
| 1              | 2   | 3   | 4  | 5  | 6  | 7  | 8  | 9  |  |

21. In operating this farm in a TYPICAL year, please indicate below, for each season of the year, the average number of hours you USUALLY work each week doing the chores shown. For chores you don't typically do, be sure to record zero hours per week. For this table, just WRITE IN your answers.

| CHORES/TASKS  |                                 | SUMMER (June - Aug.) | FALL (Sept. - Nov.) | WINTER (Dec. - Feb.) | SPRING (Mar. - May) |
|---|---------------------------------|----------------------|---------------------|----------------------|---------------------|
| Equipment/machinery maintenance   | WRITE IN AVERAGE HOURS PER WEEK | HOURS PER WEEK       | HOURS PER WEEK      | HOURS PER WEEK       | HOURS PER WEEK      |
| All other maintenance (buildings, fences, etc.)                             | WRITE IN AVERAGE HOURS PER WEEK | HOURS PER WEEK       | HOURS PER WEEK      | HOURS PER WEEK       | HOURS PER WEEK      |
| All livestock chores  | WRITE IN AVERAGE HOURS PER WEEK | HOURS PER WEEK       | HOURS PER WEEK      | HOURS PER WEEK       | HOURS PER WEEK      |
| Pesticide application   | WRITE IN AVERAGE HOURS PER WEEK | HOURS PER WEEK       | HOURS PER WEEK      | HOURS PER WEEK       | HOURS PER WEEK      |
| Fertilizer application  | WRITE IN AVERAGE HOURS PER WEEK | HOURS PER WEEK       | HOURS PER WEEK      | HOURS PER WEEK       | HOURS PER WEEK      |
| Welding   | WRITE IN AVERAGE HOURS PER WEEK | HOURS PER WEEK       | HOURS PER WEEK      | HOURS PER WEEK       | HOURS PER WEEK      |
| Tractor and/or machinery operation in the field                             | WRITE IN AVERAGE HOURS PER WEEK | HOURS PER WEEK       | HOURS PER WEEK      | HOURS PER WEEK       | HOURS PER WEEK      |
| Operation of farmstead materials handling systems (augers, conveyors, etc.) | WRITE IN AVERAGE HOURS PER WEEK | HOURS PER WEEK       | HOURS PER WEEK      | HOURS PER WEEK       | HOURS PER WEEK      |
| Operation of ag. machinery and/or trucks for market delivery (highway use)  | WRITE IN AVERAGE HOURS PER WEEK | HOURS PER WEEK       | HOURS PER WEEK      | HOURS PER WEEK       | HOURS PER WEEK      |
| Total time spent on farm tasks outside the house                            | WRITE IN AVERAGE HOURS PER WEEK | HOURS PER WEEK       | HOURS PER WEEK      | HOURS PER WEEK       | HOURS PER WEEK      |

22. How many days IN THE PAST 12 MONTHS did you spend at least 4 hours per day at work UNRELATED to the operation of this farm?

- ☐ None  
☐ 1 or more

INDICATE NUMBER OF DAYS

| NUMBER OF DAYS |     |     |    |    |    |    |    |    |  |
|----------------|-----|-----|----|----|----|----|----|----|--|
| 100            | 200 | 300 |    |    |    |    |    |    |  |
| 10             | 20  | 30  | 40 | 50 | 60 | 70 | 80 | 90 |  |
| 1              | 2   | 3   | 4  | 5  | 6  | 7  | 8  | 9  |  |

23. Have you worked or helped out on someone else's farm DURING THE PAST 12 MONTHS?

- ☐ No  
☐ Yes

24. Indicate total number of days you worked on someone else's farm IN THE PAST 12 MONTHS, and the jobs you did.

| NUMBER OF DAYS             | SELECT ALL JOB TASKS FROM LIST D |
|----------------------------|----------------------------------|
| 100 200 300                | 1 2 3 4 5 6 7 8 9 10             |
| 10 20 30 40 50 60 70 80 90 |                                  |
| 1 2 3 4 5 6 7 8 9          |                                  |

SKIP TO Q. 25

25. Please give the following information on ANY NON-AGRICULTURAL work you did during the PAST 12 MONTHS.

| WRITE IN TYPE OF PRODUCT MADE OR SERVICE PROVIDED | WRITE IN YOUR PRIMARY JOB TASKS, ACTIVITIES, OR DUTIES | INDICATE AVERAGE NUMBER OF HOURS WORKED PER WEEK  | OFFICE USE ONLY |            |
|---|--|---|-----------------|------------|
|   |  |   | INDUSTRY        | OCCUPATION |
| 1.  |  | 10 20 30 40 50 60 70 80 90<br>0 1 2 3 4 5 6 7 8 9 |                 |            |
| 2.  |  | 10 20 30 40 50 60 70 80 90<br>0 1 2 3 4 5 6 7 8 9 |                 |            |

26. How many years total have you been involved in agricultural work?

INDICATE TOTAL HERE

| TOTAL NUMBER OF YEARS |    |    |    |    |    |    |    |    |  |
|-----------------------|----|----|----|----|----|----|----|----|--|
| 10                    | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 |  |
| 1                     | 2  | 3  | 4  | 5  | 6  | 7  | 8  | 9  |  |

27. Thinking of all the paid jobs or businesses you've ever had, what kind of work did you do the longest? Consider work done while in the Armed Forces.

| WRITE IN |
|----------|
|          |

28. Considering all your employers, how many total years have you done this kind of work?

| NO. OF YEARS |   |
|--------------|---|
| 0            | 0 |
| 1            | 1 |
| 2            | 2 |
| 3            | 3 |
| 4            | 4 |
| 5            | 5 |
| 6            | 6 |
| 7            | 7 |
| 8            | 8 |
| 9            | 9 |

29. When you were doing the kind of work you described in Question 27 above, what were your most important activities or duties?

| WRITE IN | OFFICE USE ONLY |
|----------|-----------------|
|          | OCCUPATION      |

30. In what kind of business or industry did you do this kind of work the LONGEST? (For example, retail shoe store, farm, construction, etc.)

| WRITE IN | OFFICE USE ONLY |
|----------|-----------------|
|          | INDUSTRY        |

## F. Tobacco and Alcohol Use

31. Have you smoked at least 5 packs of cigarettes in your lifetime?

☐ No  
☐ Yes

INDICATE HOW OLD YOU WERE WHEN YOU FIRST STARTED SMOKING CIGARETTES FAIRLY REGULARLY

| YOUR AGE IN YEARS |    |    |    |    |    |    |    |    |  |
|-------------------|----|----|----|----|----|----|----|----|--|
| 10                | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 |  |
| 1                 | 2  | 3  | 4  | 5  | 6  | 7  | 8  | 9  |  |

32. Do you smoke cigarettes NOW?

☐ No  
☐ Yes

INDICATE NUMBER OF CIGARETTES YOU SMOKE NOW PER DAY, ON AVERAGE. (NOTE: ONE PACK = 20 CIGARETTES.)

| NUMBER PER DAY |   |
|----------------|---|
| 0              | 0 |
| 1              | 1 |
| 2              | 2 |
| 3              | 3 |
| 4              | 4 |
| 5              | 5 |
| 6              | 6 |
| 7              | 7 |
| 8              | 8 |
| 9              | 9 |

33. For the entire time you smoked in the past, how many cigarettes did you smoke per day, on average?

INDICATE NUMBER OF CIGARETTES PER DAY

| NUMBER PER DAY |   |
|----------------|---|
| 0              | 0 |
| 1              | 1 |
| 2              | 2 |
| 3              | 3 |
| 4              | 4 |
| 5              | 5 |
| 6              | 6 |
| 7              | 7 |
| 8              | 8 |
| 9              | 9 |

34. Have you EVER quit smoking cigarettes?

☐ No  
☐ Yes

INDICATE TOTAL TIME YOU STAYED OFF CIGARETTES

☐ Less than 1 year  
☐ 1 year or more

INDICATE NUMBER OF YEARS OFF

| NO. OF YEARS |   |
|--------------|---|
| 0            | 0 |
| 1            | 1 |
| 2            | 2 |
| 3            | 3 |
| 4            | 4 |
| 5            | 5 |
| 6            | 6 |
| 7            | 7 |
| 8            | 8 |
| 9            | 9 |

35. Besides cigarettes, have you ever used any other form of tobacco on a fairly regular basis?

☐ No ☐ Yes

35a: Have you chewed tobacco?

☐ No ☐ Yes

35b: Have you used snuff?

☐ No ☐ Yes

35c: Have you smoked cigars?

☐ No ☐ Yes

35d: Have you smoked a pipe?

☐ No ☐ Yes

IF YES

Do you now?

☐ No ☐ Yes

IF YES

Do you now?

☐ No ☐ Yes

IF YES

Do you now?

☐ No ☐ Yes

IF YES

Do you now?

☐ No ☐ Yes

36. In your entire life, have you had at least 12 drinks of any kind of alcoholic beverage? Do not count small tastes. (NOTE: Alcoholic beverages include beer, ale, wine, wine coolers, liquor such as whiskey, gin, rum or vodka, and cocktails and mixed drinks containing liquor.)

☐ No ☐ Yes

SKIP TO Q. 39a, SECTION 2

37. In the PAST 12 MONTHS did you have at least 12 drinks of ANY kind of alcoholic beverage?

- ☐ No  
☐ Yes

38a. IN THE PAST 12 MONTHS, on the average, how many days per week, month, or year did you drink ANY alcoholic beverages?

INDICATE NUMBER OF DAYS

| NUMBER OF DAYS |   |   |
|----------------|---|---|
| 0              | 0 | 0 |
| 1              | 1 | 1 |
| 2              | 2 | 2 |
| 3              | 3 | 3 |
| 4              | 4 | 4 |
| 5              | 5 | 5 |
| 6              | 6 | 6 |
| 7              | 7 | 7 |
| 8              | 8 | 8 |
| 9              | 9 | 9 |

PER WEEK, MONTH, OR YEAR?

- ☐ Week  
☐ Month  
☐ Year

SKIP TO Q. 39a, SECTION 2

38b. On the average, on the days that you drank alcohol, how many drinks did you have a day? (NOTE: A drink is a 12-ounce beer, a 4-ounce glass of wine or an ounce of liquor.)

| NUMBER OF DRINKS PER DAY |   |   |   |   |   |   |   |   |    |    |    |
|--------------------------|---|---|---|---|---|---|---|---|----|----|----|
| 1                        | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |

## SECTION 2 Source of Medical Care

39a. We would like to know about your use of health care services. Is there a particular clinic, health center, doctor's office or some other place that you usually go to if you are sick or need advice about your health?

- ☐ No ☐ Yes

39b. What kind of a place is it – a clinic, a health center, a hospital, a doctor's office, or some other place? Select the most appropriate ONE from the list.

- ☐ Home  
☐ Medical Doctor's Office (MD or DO) or Private Clinic  
☐ Company or School Clinic  
☐ Hospital Outpatient Clinic  
☐ Migrant Clinic  
☐ Other Clinic

PLEASE DESCRIBE

- ☐ Chiropractor or Naturopath's Office  
☐ Hospital Emergency Room  
☐ Community, Neighborhood, or Family Health Center  
☐ Rural Health Center  
☐ HMO/Prepaid Group  
☐ Other

PLEASE DESCRIBE

SKIP TO Q. 40

## SECTION 3 Stress and Well-Being

40. The questions here ask you about your feelings and behavior DURING THE LAST WEEK. In each case, you will be asked to indicate how often you felt or behaved a certain way. Although some of the questions are similar, there are differences between them and you should treat each one as a separate question. The best approach is to answer each question fairly quickly. That is, don't try to count up the number of times you felt a particular way, but rather indicate the alternative that seems like a reasonable estimate.

- 4 = Most or All of the Time (5-7 Days)  
3 = Occasionally or a Moderate Amount of Time (3-4 Days)  
2 = Some or a Little of the Time (1-2 Days)  
1 = Rarely or None of the Time (Less than 1 Day)

DURING THE PAST WEEK:

- a. I was bothered by things that usually don't bother me ..... 1 2 3 4
- b. I did not feel like eating; my appetite was poor ... 1 2 3 4
- c. I felt that I could not shake off the blues even with help from my family or friends ..... 1 2 3 4
- d. I felt that I was just as good as other people .... 1 2 3 4
- e. I had trouble keeping my mind on what I was doing ..... 1 2 3 4
- f. I felt depressed ..... 1 2 3 4
- g. I felt that everything I did was an effort ..... 1 2 3 4
- h. I felt hopeful about the future ..... 1 2 3 4
- i. I thought my life had been a failure ..... 1 2 3 4

- 4 = Most or All of the Time (5-7 Days)  
3 = Occasionally or a Moderate Amount of Time (3-4 Days)  
2 = Some or a Little of the Time (1-2 Days)  
1 = Rarely or None of the Time (Less than 1 Day)

- j. I felt fearful ..... 1 2 3 4
- k. My sleep was restless ..... 1 2 3 4
- l. I was happy ..... 1 2 3 4
- m. I talked less than usual ..... 1 2 3 4
- n. I felt lonely ..... 1 2 3 4
- o. People were unfriendly ..... 1 2 3 4
- p. I enjoyed life ..... 1 2 3 4
- q. I had crying spells ..... 1 2 3 4
- r. I felt sad ..... 1 2 3 4
- s. I felt that people disliked me ..... 1 2 3 4
- t. I could not get "going" ..... 1 2 3 4

41. The questions here ask you about your feelings and thoughts DURING THE LAST MONTH. In each case, you will be asked to indicate how often you felt or thought a certain way. Although some of the questions are similar, there are differences between them and you should treat each one as a separate question. The best approach is to answer each question fairly quickly. That is, don't try to count up the number of times you felt a particular way, but rather indicate the alternative that seems like a reasonable estimate.

5 = Very Often  
4 = Fairly Often  
3 = Sometimes  
2 = Almost Never  
1 = Never

IN THE LAST MONTH:

- a. How often have you been upset because of something that happened unexpectedly? ..... 1 2 3 4 5
- b. How often have you felt that you were unable to control the important things in your life? ..... 1 2 3 4 5
- c. How often have you felt nervous and "stressed"? ..... 1 2 3 4 5
- d. How often have you felt confident about your ability to handle your personal problems? ..... 1 2 3 4 5
- e. How often have you felt that things were going your way? ..... 1 2 3 4 5

5 = Very Often  
4 = Fairly Often  
3 = Sometimes  
2 = Almost Never  
1 = Never

- f. How often have you found that you could not cope with all the things that you had to do? ... 1 2 3 4 5
- g. How often have you been able to control irritations in your life? ..... 1 2 3 4 5
- h. How often have you felt that you were on top of things? ..... 1 2 3 4 5
- i. How often have you been angered because of things that happened that were outside of your control? ..... 1 2 3 4 5
- j. How often have you felt difficulties were piling up so high that you could not overcome them? ..... 1 2 3 4 5

## SECTION 4 Respiratory Conditions

42. Do you usually cough on most days for 3 CONSECUTIVE MONTHS OR MORE during the year?  
☐ No ☐ Yes

43. For how many years have you had this cough?  
☐ Less than 1 year ☐ 1 year or more → INDICATE NO. OF YEARS

44. Do you bring up phlegm on most days for 3 CONSECUTIVE MONTHS OR MORE during the year?  
☐ No ☐ Yes

45. For how many years have you had trouble with phlegm?  
☐ Less than 1 year ☐ 1 year or more → INDICATE NO. OF YEARS

46. Are you troubled by shortness of breath when hurrying on level ground or walking up a slight hill?  
☐ No ☐ Yes

47. Have you had wheezing or whistling in your chest at any time in the PAST 12 MONTHS?  
☐ No ☐ Yes → INDICATE NO. OF EPISODES

SKIP TO Q. 44

SKIP TO Q. 46

SKIP TO Q. 50

48. How many times in the PAST 12 MONTHS were you hospitalized overnight or longer for these episodes of wheezing or whistling?  
☐ None ☐ 1 or more → INDICATE NO. OF TIMES

49. During the PAST 12 MONTHS, how many times have you gone to a doctor's office or a hospital emergency room for one of these episodes of wheezing or whistling?  
☐ None ☐ 1 or more → INDICATE NO. OF TIMES

50. Apart from when you had a cold, does your chest EVER sound wheezy or whistling?  
☐ No ☐ Yes

51. During the PAST 12 MONTHS, have you had any episodes of stuffy, itchy, or runny nose?  
☐ No ☐ Yes → INDICATE NO. OF EPISODES

52. During the PAST 12 MONTHS, have you had any episodes of watery, itchy eyes?

☐ No  
☐ Yes

INDICATE NO.  
OF EPISODES

| EPISODES |   |
|----------|---|
| 0        | 0 |
| 1        | 1 |
| 2        | 2 |
| 3        | 3 |
| 4        | 4 |
| 5        | 5 |
| 6        | 6 |
| 7        | 7 |
| 8        | 8 |
| 9        | 9 |

53. Did you answer "Yes" to any one of the following questions from above: 47, 50, 51, or 52?

☐ No  
☐ Yes

54. Are any of the respiratory symptoms mentioned above (wheezing; whistling; stuffy, itchy, or runny nose; watery, itchy eyes) brought on by:

a. Exercise or cold air? ☐ Yes ☐ No ☐ Don't know  
b. Animals? ☐ Yes ☐ No ☐ Don't know  
c. House dust? ☐ Yes ☐ No ☐ Don't know  
d. Your work environment? (That is, do you feel better on days off?) ☐ Yes ☐ No ☐ Don't know  
e. Pollen? ☐ Yes ☐ No ☐ Don't know

SKIP TO  
Q. 56

IF YOU ANSWERED "YES" TO  
Q. 54e ABOVE, ANSWER Q. 55

55. During which months of the year does pollen make your symptoms worse? Mark all that apply:

☐ Jan ☐ Mar ☐ May ☐ Jul ☐ Sep ☐ Nov  
☐ Feb ☐ Apr ☐ Jun ☐ Aug ☐ Oct ☐ Dec

56. Have you EVER had a severe reaction, such as itching all over, trouble breathing, flushing, hives, or swelling of the face or hands or feet WITHIN AN HOUR after being stung by an insect?

☐ No ☐ Yes

57. Have you EVER had a severe reaction, such as itching all over, trouble breathing, flushing, hives, or swelling of the face or hands or feet WITHIN AN HOUR after receiving allergy shots or an allergy test?

☐ No  
☐ Yes  
☐ Never received allergy shots or test  
☐ Don't know

58. Have you EVER given up or had to avoid a pet because of allergies?

☐ No ☐ Yes

59. During the PAST 12 MONTHS, have you had any of the following conditions

a. Cold or flu?

☐ No  
☐ Yes

| INDICATE NO. OF EPISODES |    |    |    |    |    |    |    |    |  |
|--------------------------|----|----|----|----|----|----|----|----|--|
| 10                       | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 |  |
| 1                        | 2  | 3  | 4  | 5  | 6  | 7  | 8  | 9  |  |

b. Sinusitis or sinus problems?

☐ No  
☐ Yes

| INDICATE NO. OF EPISODES |    |    |    |    |    |    |    |    |  |
|--------------------------|----|----|----|----|----|----|----|----|--|
| 10                       | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 |  |

c. Pneumonia?

☐ No  
☐ Yes

| INDICATE NO. OF EPISODES |    |    |    |    |    |    |    |    |  |
|--------------------------|----|----|----|----|----|----|----|----|--|
| 10                       | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 |  |
| 1                        | 2  | 3  | 4  | 5  | 6  | 7  | 8  | 9  |  |

60. Does your chest EVER feel tight in connection with work?

☐ No  
☐ Yes

61. Does the chest tightness occur on any particular day?

☐ No  
☐ Yes

SKIP TO  
Q. 63

62. When does it occur?

☐ Only during the first few days back at work  
☐ Other day(s) also  
☐ Only on other days

63. DURING THE PAST 12 MONTHS, have you had episodes of flu-like symptoms (fever, shivering, malaise, cough, tiredness, weakness, muscle and joint pains) in connection with dusty work?

☐ No  
☐ Yes

INDICATE NO.  
OF TIMES

| TIMES |   |
|-------|---|
| 0     | 0 |
| 1     | 1 |
| 2     | 2 |
| 3     | 3 |

| 9     | 9 |

SKIP TO  
Q. 66

64. Please describe the circumstances when these symptoms occurred.

DESCRIBE CIRCUMSTANCES HERE

65. When experiencing the flu-like symptoms in connection with dusty work, how long, in general, would the symptoms last?

☐ Until the next day  
☐ Several days  
☐ Don't know/Can't remember

66. How often do you wear any type of breathing protection when you are exposed to dust?

☐ Usually (50% or more of the time)  
☐ Occasionally (less than 50% of the time)  
☐ Never  
☐ Not exposed to dust

# SECTION 5 Hearing Loss

| AGE IN YEARS |   |
|--------------|---|
| 0            | 0 |
| 1            | 1 |
| 2            | 2 |
| 3            | 3 |
| 4            | 4 |
| 5            | 5 |

| 7            | 7 |
| 8            | 8 |
| 9            | 9 |

67. Which statement below best describes your hearing in your LEFT ear (without a hearing aid)?

☐ Good ☐ Lot of trouble

☐ Little trouble ☐ Deaf

68. Which statement below best describes your hearing in your RIGHT ear (without a hearing aid)?

☐ Good ☐ Lot of trouble

☐ Little trouble ☐ Deaf

IF YOU ANSWERED "GOOD" TO Q. 67, SKIP TO Q. 76

69. (Without a hearing aid), can you usually HEAR and UNDERSTAND what a person says without seeing his face if that person WHISPERS to you from across a quiet room?

☐ No ☐ Yes

70. (Without a hearing aid), can you usually HEAR and UNDERSTAND what a person says without seeing his face if that person TALKS IN A NORMAL VOICE to you from across a quiet room?

☐ No ☐ Yes

71. (Without a hearing aid), can you usually HEAR and UNDERSTAND what a person says without seeing his face if that person SHOUTS to you from across a quiet room?

☐ No ☐ Yes

72. (Without a hearing aid), can you usually HEAR and UNDERSTAND what a person says without seeing his face if that person SPEAKS LOUDLY into your better ear?

☐ No ☐ Yes

73. Do you CURRENTLY have any trouble hearing?

☐ No ☐ Yes

INDICATE YOUR AGE WHEN TROUBLE BEGAN

74. Have you EVER seen a doctor about hearing trouble or deafness?

☐ No ☐ Yes

75. According to the doctor, what caused your hearing trouble or deafness? Select all that apply.

☐ An ear infection

☐ Exposure to loud noise

☐ Ear surgery

☐ An ear injury

☐ Hearing trouble or deafness from birth

☐ Some other cause

☐ No cause identified

PLEASE DESCRIBE

SKIP TO Q. 76

76. Do you NOW work around, or have you EVER worked around, noisy farm equipment?

☐ No ☐ Yes

SKIP TO Q. 78

77. Do you wear hearing protection when you use or are around noisy farm equipment?

☐ No

☐ Yes, occasionally (less than 50% of the time)

☐ Yes, usually (50% or more of the time)

78. Do you NOW have tinnitus (ringing in the ears)?

☐ No ☐ Yes

79. For EACH kind of equipment listed below, indicate whether or not you have EVER used it, even if you answered "No" to Question 76 above. If you have, then estimate the total number of years you have used the equipment, along with the average number of days per year and the average number of hours per day. If you've used a noisy piece of equipment not listed below, please use the blank space(s) provided for a description.

| EQUIPMENT                             | EVER USED?   | ESTIMATE TOTAL NUMBER OF YEARS USED    | ESTIMATE AVERAGE NUMBER OF DAYS USED PER YEAR                  | ESTIMATE AVERAGE NUMBER OF HOURS USED PER DAY |

## SECTION 6 Injury

84. During the PAST 12 MONTHS, have you, a family member, or any other person who regularly lives or works on this farm had an injury for which the injured person saw or talked to a medical doctor or assistant, or the injured person cut down on their usual activities for more than half a day?

☐ No  
☐ Yes

SKIP TO  
Q. 85a.

USE THE PERSON NUMBERS FROM QUESTION 11 ON PAGE 3 TO INDICATE IN THE GRID TO THE RIGHT WHO WAS INJURED. SELECT ALL THAT APPLY, THEN ANSWER QUESTIONS 84a THROUGH 84k FOR EACH INJURY. IF ONE PERSON WAS INJURED MORE THAN ONCE, CONSIDER EACH INJURY SEPARATELY. IF MORE THAN 3 INJURIES OCCURRED IN THE PAST 12 MONTHS, PLEASE PROVIDE THE SAME INFORMATION ON A SEPARATE PIECE OF PAPER.

ALL INJURED PERSONS - GET PERSON NUMBERS FROM Q. 11  
① ② ③ ④ ⑤ ⑥ ⑦ ⑧ ⑨ ⑩ ⑪ ⑫ ⑬ ⑭ ⑮

### INJURY 1 (THE MOST RECENT)

IDENTIFY INJURED PERSON WITH  
PERSON NUMBERS FROM QUESTION 11

PERSON NO. FROM Q. 11  
① ② ③ ④ ⑤ ⑥ ⑦ ⑧ ⑨ ⑩ ⑪ ⑫ ⑬ ⑭ ⑮

84a. Please indicate the date of this injury.

| MO | DAY | YEAR |
|----|-----|------|
| 0  | 0   | 0    |
| 1  | 1   | 1    |
| 2  | 2   | 2    |
| 3  | 3   | 3    |
| 4  | 4   | 4    |
| 5  | 5   | 5    |
| 6  | 6   | 6    |
| 7  | 7   | 7    |
| 8  | 8   | 8    |
| 9  | 9   | 9    |

84b. What part(s) of the body was/were injured? Refer to LIST E for body parts codes and select all that apply:

① ② ③ ④ ⑤ ⑥ ⑦ ⑧  
⑨ ⑩ ⑪ ⑫ ⑬ ⑭ ⑮ ⑯

84c. What kind of injury was it? Refer to LIST F for kind of injury codes and select all that apply:

① ② ③ ④ ⑤ ⑥ ⑦ ⑧ ⑨ ⑩ ⑪  
⑫ ⑬ ⑭ ⑮ ⑯ ⑰ ⑱ ⑲ ⑳ ㉑ ㉒

84d. Describe how injury happened:

84e. Describe what the injured person was doing at the time of the injury:

84f. OTHER THAN THE DAY OF THE INJURY, how many FULL days of scheduled work did the injured person miss as a result of the injury?

⑩ ⑪ ⑫ ⑬ ⑭ ⑮ ⑯ ⑰ ⑱ ㉑ ㉒  
⑩ ⑪ ⑫ ⑬ ⑭ ⑮ ⑯ ⑰ ⑱ ㉑ ㉒  
⑩ ⑪ ⑫ ⑬ ⑭ ⑮ ⑯ ⑰ ⑱ ㉑ ㉒

84g. Was the injured person working at a job off the farm at the time of this injury?

☐ Yes ☐ No

84h. Did the injured person miss more than half of the day from work on the day of this injury?

☐ Yes ☐ No

84i. Was the activity the injured person was doing at the time of this injury part of the person's usual job tasks?

☐ Yes ☐ No

84j. Did the injured person make a permanent change in his/her work activities because of this injury?

☐ Yes ☐ No

84k. Did the injured person permanently change his/her off-the-job activities because of this injury?

☐ Yes ☐ No

injured? Refer to LIST E for body  
parts codes and select all that apply:  
① ② ③ ④ ⑤ ⑥ ⑦ ⑧  
⑨ ⑩ ⑪ ⑫ ⑬ ⑭ ⑮ ⑯84c. What kind of injury was it? Refer to  
LIST F for kind of injury codes and  
select all that apply:  
① ② ③ ④ ⑤ ⑥ ⑦ ⑧ ⑨ ⑩ ⑪  
⑫ ⑬ ⑭ ⑮ ⑯ ⑰ ⑱ ⑲ ⑳ ㉑ ㉒

84d. Describe how injury happened:

84e. Describe what the injured person was doing  
at the time of the injury:84f. OTHER THAN THE DAY OF THE INJURY, how  
many FULL days of scheduled work did the  
injured person miss as a result of the injury?  
⑩ ⑪ ⑫ ⑬ ⑭ ⑮ ⑯ ⑰ ⑱ ⑲ ⑳ ㉑ ㉒  
① ② ③ ④ ⑤ ⑥ ⑦ ⑧ ⑨84g. Was the injured person working at a job off the farm at the time of this injury? ☐ Yes ☐ No84h. Did the injured person miss more than half of the day from work on the day of this injury? ☐ Yes ☐ No84i. Was the activity the injured person was doing at the time of this injury part of the person's usual job tasks? ☐ Yes ☐ No84j. Did the injured person make a permanent change in his/her work activities because of this injury? ☐ Yes ☐ No84k. Did the injured person permanently change his/her off-the-job activities because of this injury? ☐ Yes ☐ No**SECTION 7 Occupational Safety and Health**

85a. Has anyone working on this farm had training in the prevention of occupational injuries or illnesses?

☐ No  
☐ YesINDICATE WHICH AREA  
OF TRAINING☐ Occupational injuries ☐ Both  
☐ Occupational illnesses

85b. Have you made any major changes in equipment or processes in the past five years for reasons of health protection or injury prevention, and/or because of government advice?

☐ No  
☐ YesINDICATE WHY CHANGES  
WERE MADE☐ To protect health ☐ Both  
☐ Because of government advice

85c. Have you made substitutions of the chemicals you used in the past five years for reasons of health protection and/or because of government advice?

☐ No  
☐ YesINDICATE WHY CHANGES  
WERE MADE☐ To protect health ☐ Both  
☐ Because of government advice

85d. Have you received an on-site occupational health or safety consultation in the PAST 12 MONTHS, or has any on-site measurement or evaluation of exposure to dusts, gases, fumes, or physical agents (such as noise) been performed on this farm? Select all that apply below.

☐ No  
☐ Yes, health or safety consultation  
☐ Yes, on-site measurement or evaluation of physical agent exposure (such as noise)  
☐ Yes, on-site measurement or evaluation of exposure to dusts, gases, or fumes

86. Do you feel that personal protective devices like goggles, steel-toed boots, or ear plugs are needed during the conduct of any of the operations of this farm?

☐ No  
☐ YesINDICATE WHICH OPERATIONS BY  
SELECTING ALL JOB TASKS CODES  
FROM LIST D THAT APPLY.

## SECTION 8 Skin Conditions

87. Did any of the following substances get on your HANDS or ARMS while at work on the farm DURING THE PAST 12 MONTHS?

- Yes No
- a. Solvents or degreasers? ☐ ☐
- b. Petroleum products other than solvents (like grease, oil, or fuel)? ☐ ☐
- c. Soaps, detergents, or cleaning and disinfecting solutions used in performing your job? ☐ ☐
- d. Cutting oils, machine coolants, or metal working fluids? ☐ ☐
- e. Paints, varnishes, lacquers, or other coatings? ☐ ☐
- f. Glues, pastes, or other adhesives? ☐ ☐
- g. Pesticides, insecticides, herbicides, fungicides, or fumigants? ☐ ☐
- h. Did you get any other chemicals or substances on your hands or arms that could irritate the skin? ☐ ☐

WHAT CHEMICALS OR SUBSTANCES?

88. During the PAST 12 MONTHS, have you had dermatitis, eczema, or any other red, inflamed skin rash?

☐ No ☐ Yes

89. During the PAST 12 MONTHS, on about how many days altogether did you have a skin condition? Include days when you used treatment for the condition.

☐ Every day  
☐ Not every day

INDICATE HOW MANY DAYS

| DAYS |   |
|------|---|
| 0    | 0 |
| 1    | 1 |
| 2    | 2 |
| 3    | 3 |
| 4    | 4 |
| 5    | 5 |
| 6    | 6 |
| 7    | 7 |
| 8    | 8 |
| 9    | 9 |

90. What parts of your body were affected by this skin condition? Select all that apply.

☐ Hands  
☐ Arms  
☐ Head, face, or neck  
☐ Other body parts

PLEASE SPECIFY

91. Did any skin conditions you had IN THE PAST 12 MONTHS result from chemicals or other substances that got on your skin?

☐ No  
☐ Don't know  
☐ Yes

WHAT CHEMICALS OR SUBSTANCES?

92. Were you at work farming when these substances got on your skin?

☐ No  
☐ Don't know  
☐ Yes

SKIP TO SECTION 9

## SECTION 9 Selected Symptoms

93. Below is a list of questions concerning certain symptoms you may have had IN THE PAST 12 MONTHS. For each question below, mark the appropriate oval that indicates how often you've experienced the symptom IN THE PAST 12 MONTHS.

5 = Extremely  
4 = Quite a Bit  
3 = Moderately  
2 = A Little  
1 = Not at All

- a. Have you tired more easily than expected for the amount of activity you do? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- b. Have you felt lightheaded or dizzy? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- c. Have you had difficulty concentrating? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- d. Have you been confused or disoriented? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- e. Have you had trouble remembering things? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- f. Have your relatives noticed that you have trouble remembering things? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- g. Have you had to make notes to remember things? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- h. Have you found it hard to understand the meaning of newspapers, magazines and books you have read? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- i. Have you felt irritable? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- j. Have you felt depressed? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- k. Have you had heart palpitations even when not exerting yourself? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- l. Have you had a seizure? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- m. Have you been sleeping more often than is usual for you? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- n. Have you had difficulty falling asleep? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- o. Have you been bothered by lack of coordination or loss of balance? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- p. Have you had any loss of muscle strength in your legs or feet? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- q. Have you had any loss of muscle strength in your arms or hands? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- r. Have you had difficulty moving your fingers or grasping things? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- s. Have you had numbness or tingling in your fingers lasting more than a day? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- t. Have you had numbness or tingling in your toes lasting more than a day? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- u. Have you had headaches at least once a week? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- v. Have you had difficulty driving after work because you felt dizzy or tired, even though you'd slept enough, etc.? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- w. Have you felt 'high' from the chemicals you use at work? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
- x. Have you had a lower tolerance for alcohol (takes less to get drunk)? ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5

OUR THANKS TO THE P.O. FOR COMPLETING SECTIONS 1-9. THE P.O.'s SPOUSE OR THE PERSON IN THE HOUSEHOLD CLOSEST IN AGE TO THE P.O. SHOULD FILL OUT THE REST OF THE QUESTIONNAIRE. PLEASE USE THE PERSON NO. FROM QUESTION 11 TO INDICATE THE IDENTITY OF THE SPOUSE OR CLOSEST-IN-AGE HOUSEHOLDER HERE

| PERSON NO. FROM Q.11 |   |   |   |   |   |   |   |   |    |
|----------------------|---|---|---|---|---|---|---|---|----|
| 1                    | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |

## SECTION 10 Work History of Spouse or Closest-in-Age Householder

94. Your date of birth is

| MO | DAY | YR |
|----|-----|----|
| 0  | 0   | 0  |
| 1  | 1   | 1  |
| 2  | 2   | 2  |
| 3  | 3   | 3  |
| 4  | 4   | 4  |
| 5  | 5   | 5  |
| 6  | 6   | 6  |
| 7  | 7   | 7  |
| 8  | 8   | 8  |
| 9  | 9   | 9  |

95a. Your sex is ...

- ☐ Male  
☐ Female

95b. Your race is ...

- ☐ White ☐ American Indian or Alaskan Native  
☐ Black ☐ Asian or Pacific Islander

95c. Your ethnicity is ...

- ☐ Hispanic origin  
☐ Not of Hispanic origin

96. Please indicate which category below best describes your education:

- ☐ Did not graduate from High School ☐ Some college  
☐ High School graduate ☐ College graduate or higher

97. For how many years total have you lived on this or any other agricultural location(s)?

| NUMBER OF YEARS |    |    |    |    |    |    |    |    |  |
|-----------------|----|----|----|----|----|----|----|----|--|
| 10              | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 |  |
| 1               | 2  | 3  | 4  | 5  | 6  | 7  | 8  | 9  |  |

98. For each occupation listed to the right, please estimate the percentage of your time spent in each DURING THE PAST 12 MONTHS.

| OCCUPATION  | PERCENT OF TIME                  |
|---|----------------------------------|
| Farming   | 0 10 20 30 40 50 60 70 80 90 100 |
| Farm administration (record keeping, inventory, etc.) | 0 10 20 30 40 50 60 70 80 90 100 |
| Home making   | 0 10 20 30 40 50 60 70 80 90 100 |
| Student   | 0 10 20 30 40 50 60 70 80 90 100 |
| Other employment                                      | 0 10 20 30 40 50 60 70 80 90 100 |

99. How many days IN THE PAST 12 MONTHS did you work at least 4 hours per day on the operation of this farm?

- ☐ None  
☐ 1 or more

INDICATE NUMBER OF DAYS

| NUMBER OF DAYS |     |     |    |    |    |    |    |    |  |
|----------------|-----|-----|----|----|----|----|----|----|--|
| 100            | 200 | 300 |    |    |    |    |    |    |  |
| 10             | 20  | 30  | 40 | 50 | 60 | 70 | 80 | 90 |  |

103. BLANK - Go to QUESTION 104.

## SECTION 11 Tobacco and Alcohol Use of Spouse or Closest-in-Age Householder

**104.** Have you smoked at least 5 packs of cigarettes in your lifetime?

☐ No ☐ Yes

**SKIP TO Q. 108**

**INDICATE HOW OLD YOU WERE WHEN YOU FIRST STARTED SMOKING CIGARETTES FAIRLY REGULARLY**

**YOUR AGE IN YEARS**

|    |    |    |    |    |    |    |    |    |
|----|----|----|----|----|----|----|----|----|
| 10 | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 |
| 1  | 2  | 3  | 4  | 5  | 6  | 7  | 8  | 9  |

**105.** Do you smoke cigarettes NOW?

☐ No ☐ Yes

**INDICATE NUMBER OF CIGARETTES YOU SMOKE NOW PER DAY, ON AVERAGE. (NOTE: ONE PACK = 20 CIGARETTES.)**

**NUMBER PER DAY**

|   |   |   |   |   |   |   |   |   |   |
|---|---|---|---|---|---|---|---|---|---|
| 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |
| 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |

**106.** For the entire time you smoked in the past, how many cigarettes did you smoke per day, on average?

**INDICATE NUMBER OF CIGARETTES PER DAY**

**NUMBER PER DAY**

|   |   |   |   |   |   |   |   |   |   |
|---|---|---|---|---|---|---|---|---|---|
| 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |
| 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |

**107.** Have you EVER quit smoking cigarettes?

☐ No ☐ Yes

**INDICATE TOTAL TIME YOU STAYED OFF CIGARETTES**

☐ Less than 1 year ☐ 1 year or more

**INDICATE NUMBER OF YEARS OFF**

**NO. OF YEARS**

|   |   |   |   |   |   |   |   |   |   |
|---|---|---|---|---|---|---|---|---|---|
| 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |
| 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |

**108.** In your entire life, have you had at least 12 drinks of any kind of alcoholic beverage? Do not count small tastes. (NOTE: Alcoholic beverages include beer, ale, wine, wine coolers, liquor such as whiskey, gin, rum or vodka, and cocktails and mixed drinks containing liquor.)

☐ No ☐ Yes

**109.** In the PAST 12 MONTHS did you have at least 12 drinks of ANY kind of alcoholic beverage?

☐ No ☐ Yes

## SECTION 12 Selected Conditions

**110.** Does ANYONE in your household NOW have:

a. Deafness in one or both ears? ☐ No ☐ Yes

**INDICATE WHO IN YOUR HOUSEHOLD BY SELECTING THE PERSON NO. FROM QUESTION 11. SELECT ALL THAT APPLY.**

**PERSON NO. FROM Q. 11**

|   |   |   |   |   |   |   |   |   |    |
|---|---|---|---|---|---|---|---|---|----|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
|---|---|---|---|---|---|---|---|---|----|

b. Any other trouble hearing with one or both ears? ☐ No ☐ Yes

**INDICATE WHO IN YOUR HOUSEHOLD BY SELECTING THE PERSON NO. FROM QUESTION 11. SELECT ALL THAT APPLY.**

**PERSON NO. FROM Q. 11**

|   |   |   |   |   |   |   |   |   |    |
|---|---|---|---|---|---|---|---|---|----|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
|---|---|---|---|---|---|---|---|---|----|

c. Tinnitus (ringing in the ears)? ☐ No ☐ Yes

**INDICATE WHO IN YOUR HOUSEHOLD BY SELECTING THE PERSON NO. FROM QUESTION 11. SELECT ALL THAT APPLY.**

**PERSON NO. FROM Q. 11**

|   |   |   |   |   |   |   |   |   |    |
|---|---|---|---|---|---|---|---|---|----|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
|---|---|---|---|---|---|---|---|---|----|

d. A missing finger, hand or arm? ☐ No ☐ Yes

**INDICATE WHO IN YOUR HOUSEHOLD BY SELECTING THE PERSON NO. FROM QUESTION 11. SELECT ALL THAT APPLY.**

**PERSON NO. FROM Q. 11**

|   |   |   |   |   |   |   |   |   |    |
|---|---|---|---|---|---|---|---|---|----|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
|---|---|---|---|---|---|---|---|---|----|

e. A missing toe, foot, or leg? ☐ No ☐ Yes

**INDICATE WHO IN YOUR HOUSEHOLD BY SELECTING THE PERSON NO. FROM QUESTION 11. SELECT ALL THAT APPLY.**

**PERSON NO. FROM Q. 11**

|   |   |   |   |   |   |   |   |   |    |
|---|---|---|---|---|---|---|---|---|----|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
